Balanced Assessment System Professional Development Series

#1 Getting ISAT Data in the Hands of Teachers

Questions and Answers

Can students be in more than one roster?

Yes, a student can be assigned to all the different teachers who need to see their data.

Am I understanding correctly....that last year's testing data can be applied to this year's student rosters?

For teachers to see data of the current students in their class, select * see scores of my current students and the 2014-15 administration under ISAT Summative (on the ORS dashboard).

To clarify, this is the way for teachers to see student scores from last year, including students who were not enrolled with us last year?

Yes, when you add a student from another Idaho district, their data comes with them. If they came from out of state you will not see ISAT data when you enroll them.

Entering rosters - At my school, 25 teachers times 5 classes of an average of about 25 students means creating 125 rosters totaling over 3000 student entries. Is this what is expected of school test coordinators?

The spreadsheet to fill out for rosters is very simple with many columns using repeating entries, i.e. District, school. It just requires teacher email and student EDUID. You should be able to download this info from your SIS or cut and paste. Please email me, and I can give you the names of some people at our larger districts who have added all their rosters this year. They may have some tips for you.
